SUPPLY SYSTEMS

Combining clever, contemporary design with practical office requirements, Systems Supply makes it possible for you to create a high quality, modern, flexible workspace environment unique to your needs.

Systems Supply has been creating better workplace environments since 1993. Our approach is simple, we communicate and collaborate with you. Consulting with the industry's architects and designers ensures we develop a workstation system that not only fits the way you want to work, but it also reflects the latest trends in design, style and materials. Each system is locally designed and manufactured and can be customised to cover the full spectrum of commercial office requirements.

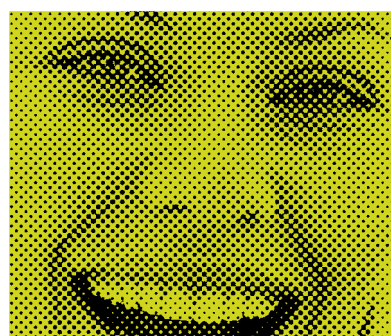

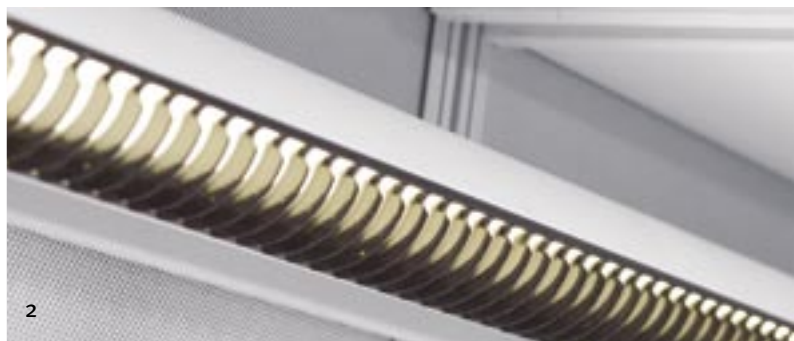

Panel by panel the DUO workstation system will open up the possibilities for your office space design. You have total flexibility to transform this simple panel system into a cost efficient solution unique to your specific workflow needs.

Adaptable. Flexible. Possible

DUO is an uncomplicated panel workstation system and one of the most efficient office environment solutions available. The aluminium frame together with the large size panels, gives you flexible design options. Choose from glass, fabric, laminate or veneer panel in-fills. Decide on the shape and height of your worktops to suit your ergonomic requirements and your office layout. Manage power and data cables neatly and efficiently. Select from a range of compatible storage and filing accessories. The DUO workstation system's unique "keyway" fixing system makes it possible to assemble, disassemble and adjust your office environment to suit your specific workflow needs easily and cost efficiently.

1. Desk height adjustment bracket (infinite adjustment)
2. Task lighting
3. Overhead hampers
4. Various accessory wall tray options
5. Keyboard sleeve
6. Power outlet detail
7. Shelving configuration
8. Keyway locking detail
